

Make sure your passengers AND their bags catch the onward flight they want!

Accurate, MCT data is a critical component in building valid connections.

Connection building is complex. It becomes impossible without valid MCTs. OAG MCT is at the core of all good connection generators. OAG MCT data is the single most comprehensive, accurate and up-to-date source available in the market. Team OAG MCT with OAG Schedules data and get an unbeatable combination that will ensure you build the right connections.

OAG MCT provides the ultimate in quality data:

- Comprehensive MCT data
- OAG's MCT database contains over 70,000 individual MCTs
- More than 60,000 of these are exceptions to the status standards
- OAG applies 5,000 changes per month including those driven by code share agreements between airlines
- OAG and airlines work in partnership to ensure MCT accuracy
- OAG actively seeks full carrier agreement for all MCT exceptions loaded

OAG MCT service:

- OAG MCT files are formatted in accordance with the hierarchy agreed between airlines, GDS and OAG
- OAG MCT format is accepted as the industry standard
- Choose a frequency to suit your business needs – daily, weekly, monthly or ad-hoc
- Choose a complete file or select MCTs by airport or carrier
- File delivery by FTP or email

Customer benefits:

- Improve customer satisfaction
 - Make sure you generate the best connections
 - Make sure your customers make their connections
 - Make sure you only generate valid connections
- Reduce the costs associated with failed connections
