

Complete and Accurate Data for Smarter Business Decisions

As the world's leading and most trusted source of schedules information, OAG collects data from over 1,000 airlines and 3,500 airports worldwide. OAG data is widely recognized as the most comprehensive and accurate. Up-to-date Reference Data complements OAG Schedules and is an indispensable support when processing highly volatile schedules data. Whether passenger or cargo related, we have the data you need in a format that works for you.

Available Data:

- Flight schedules - cargo and passenger
- Rail schedules
- Mail, Ferry and Truck schedules
- Location Names code/decode files
- Carrier code/decode files
- Equipment code/decode files
- Daylight Saving Time (DST)/Time Zone files
- Aircraft configuration files

How OAG Reference Data Benefits You:

- Accurate and current data improves internal efficiencies and customer service
- Flexibility of data formats and frequency of supply enables you to meet business needs
- Comprehensive, accurate and up-to-date
- Data you can trust

OAG Reference Data provides all the support and code/decode data you will need when processing schedules:

- Countries/states/cities/airports
- Time Zone and DST
- Carriers
- Equipment
- Aircraft Configurations

OAG collects, verifies, corrects and enhances data for more than 1,000 airlines worldwide and 95% of our database, which contains over 28 million of annual flight departures, is refreshed every week.

OAG distributes this data to Global Distribution Systems, e-portals, airlines, airports, travel agents and industry analysts.

OAG Reference Data is the best data source available, saving time & money and helping you to satisfy your customers first time, every time.
