

## Get the industry's most complete and accurate data for more effective market analysis

**OAG Schedules iNET** contains passenger and cargo flight information on virtually every carrier in the world—more than 1,000 published carriers operating to over 4,000 airports.

**OAG Schedules iNET** provides over 30-years of global airline schedules, making it the most powerful and comprehensive aviation industry trend analysis tool available today.

The sophisticated but user-friendly design provides maximum flexibility by organizing and retrieving the information you need in a ready-to-analyze format. Study and summarize schedules information at any level of detail; by carrier or alliance group, airport, equipment type, capacity share, ASMs/ASKs, distance, trip time, QSI, individual market, world region or country or any combination of these elements.

### Powerful features:

- Quickly scans, calculates, and consolidates daily schedules into weekly, monthly, quarterly or yearly reports
- Delivered as a downloadable tool or on CD
- Eliminates code share duplication
- Time-series capability and historical data availability
- Year-over-year comparisons can be made on an annual, quarterly, monthly or daily basis back to 1979

### How OAG Schedules iNET benefits you:

- Gain confidence with the reliability and accuracy you need in business planning
- Get seamless analysis of long-range time-series for analysis of market trends
- Save time with a flexible and easy to use interface
- Get data the way you want it with multiple delivery options

### Reliability from a name you can trust

OAG continually updates its airline schedules database. The database is built on the full day-by-day operations of each scheduled carrier. This information is refreshed in Schedules iNET weekly or monthly for CD subscribers.

Trust OAG to provide the most accurate and comprehensive industry data available.
