

The ultimate solution for analyzing passenger and cargo traffic

Successful aviation planning demands extensive research to uncover opportunities. OAG makes it easy to analyse passenger and cargo traffic to, from and within the US with its T100 iNET tool.

Thanks to our unique working relationship with the US Department of Transportation (DOT), OAG T100 iNET makes light work of running detailed reports about on-board passenger and cargo for any flight involving a US airport.

Not only does this tool give you unlimited online access to the very latest data; our historical archive database enables you to track US domestic activity back to 1981 and international data back to 1990.

Detailed information is overlaid with powerful analytical and reporting software to give you intelligence at the click of a button. Benchmark performance, run comparisons and identify trends with ease. In no time at all you'll have the insight you need to uncover opportunities that will benefit your business.

Features:

OAG T100 iNET contains comprehensive segment and market data filed with the US DOT:

- Segment data covers capacity, passenger and cargo information on non-stop only services
- Market data covers passenger, freight and mail counts on all city pair same plane non-stop/multi-stop services
- Analyze traffic by airline, aircraft type and service class
- US domestic and international versions of each database for efficient and focused reporting

Run complex calculations with ease:

- Flexible and sophisticated query tool
- Output reports in your format of choice

How OAG T100 iNET benefits you

- Save research time and costs
- Gain competitive insight and market intelligence
- Uncover network development opportunities
- Optimize fleet management
- Sharpen and validate business strategies
