

Essential Fleet Information

Overview

OAG Fleet Solutions data offers a detailed account of every commercial aircraft currently in service, storage, or on order. Accessible via the internet, CD or raw data feed.

OAG Fleet allows sophisticated data searches, with print ready reports or Excel spreadsheets quickly presented in a user friendly format. Highly flexible, OAG Fleet iNET allows you to understand trends in the world's commercial aircraft market quickly and easily.

OAG Fleet Data gives you control over the data. Providing you with the raw feed for your own Business Intelligence (BI) systems.

Powerful Features

OAG Fleet iNET:

- Generates custom reports with a click of a button
- Outputs to a wide range of formats, including text, Excel and dBase
- Creates historical time series for trend analysis
- Available print-ready reports on Airline Fleets, Stored Aircraft, Engine Summaries, Aircraft Histories by Tail/Serial Number and Aircraft Operator Summaries
- Fleet changes are captured and updated weekly for online customers and monthly for CD subscribers

OAG Fleet Data:

- Gives you the flexibility to slice and dice the data
- Query using your own BI tools
- All the data contained in our leading Fleet iNET tool

How OAG Fleet iNET Benefits You

- Flexible reporting and output options help you easily access and analyze the data you need
- Save time with fast responses to database queries
- Get the most up-to-date outlook on the commercial aircraft industry
- Data you can trust
