

Evaluate flight connection possibilities with ease

OAG Connections Builder helps you uncover profitable route development and partnership opportunities. This innovative and extremely flexible analysis tool enables you to create connection scenarios, partnership and marketing alliances and to analyze their potential for growing your business.

Fast and easy-to-use, the software builds every possible city-pair connection for any airline or airport in the world and is the only tool that can reliably eliminate code-share double counting for more accurate carrier comparisons.

Powerful features:

- Connection possibilities sourced from OAG's comprehensive global schedules database of non-stop and direct flight data for more than 1,000 airlines
- Schedule scenarios are validated using OAG's Minimum Connecting Time (MCT) database – the world's only consolidated source of industry standard and carrier-specific MCT data
- Incorporates OAG Fleet data for accurate capacity projections
- Flexible query tool for evaluating any connection scenario
- Default settings can be customized to define any combination of carrier, airport or alliance group
- Built-in QSI (Quality of Service Index) model for assessing potential connections with existing non-stop and direct flight schedules
- Available on CD and updated monthly

Do more with OAG Connections Builder:

- Conduct in-depth assessments of commercial opportunities
- Study the connection dynamics of any airport, airline or marketing alliance
- Evaluate an infinite number of scenarios quickly and easily
- Effectively compare different options

How OAG Connections Builder benefits you:

- Identify profitable new routings
- Validate route development strategies
- Confidently project revenue potential from new partnerships and marketing alliances
- Respond faster to market changes
- Gain a competitive advantage
- Save research time and costs
