

## The App that takes your brand mobile

Today's savvy traveler knows the value of up-to-date flight information. Enrich the experience with your own customized **OAG FlightTimes** App, a fully hosted mobile application for airlines and airports to use as part of their multi-channel marketing strategy. This new, state of the art App is fully compatible with iPhone, Android and BlackBerry devices. Fast and simple to download, it delivers customized real-time schedule and flight status information to your business and leisure travelers direct to their smartphones.

### Powerful flight data features: Value to your customers

- **OAG FlightTimes** data is sourced directly from OAG's superior quality global databases
- Comprehensive schedules, minimum connecting times and airport terminal codes
- Direct flights and dynamically generated single connections, including low cost
- Utilizes OAG's unique ability and expertise to apply over 400 validity checks to each flight update
- Schedules data refreshed daily
- Fully integrated with OAG's real-time Flight Status database for delays, terminal/gate changes and cancellations
- Your branded **OAG FlightTimes** App is easy to use and navigate
- Flexible search function allows searches by route, flight number or by airport - the fast and convenient way to view and compare direct and connecting flight schedules, and track the status of their flights
- With the "My Flights" feature, travelers can save their search results, and these are automatically refreshed and updated each time they are accessed
- iPhone users have the additional 'Spin the Globe' option, where they can zoom in or out of the globe and select the origin and destination points for their trip

### Customize your App

Brand your **OAG FlightTimes** App with your logo and add your company's marketing messages on the welcome screen.

Set the parameters for the flight information available on your App from the world's most comprehensive schedules database.

Choose direct flights and dynamically generated single connections to and from your airport or for your airline and your code share partners.
